His experience also includes construction engineering and quality control on projects in Florida, USA. He is one of the founding partners of Smartz Pro LLC.

Joseph M. Kalapele

Smartz Pro LLC

Engineering Construction, Management and Consultancy

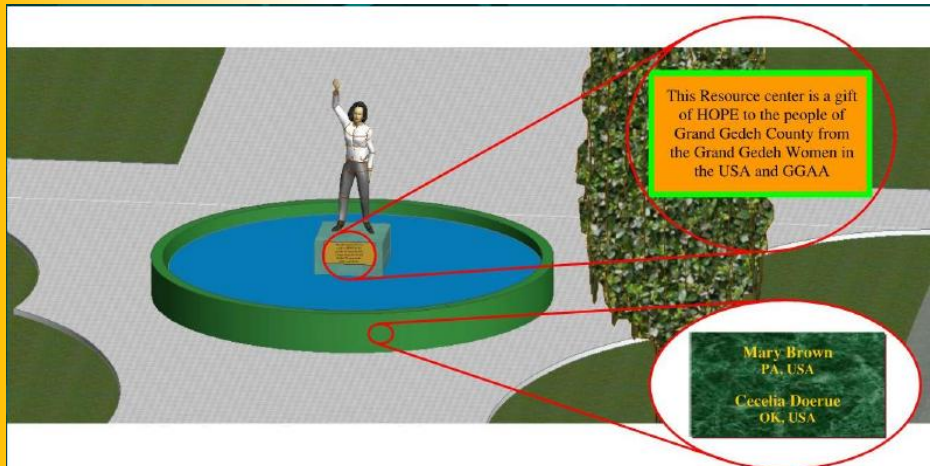

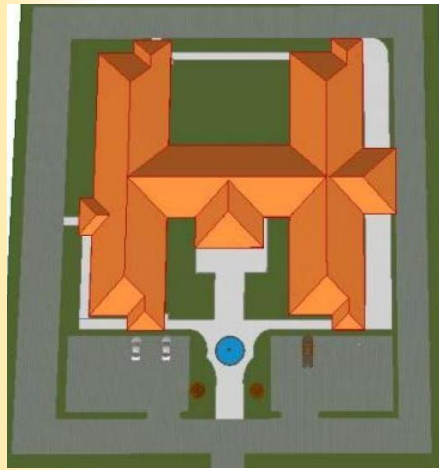

Smartz Pro Engineering worked on the conception and architectural design of the Resource Center in Grand Gedeh County. The Client was the Women Wing of the Grand Gedeh Association in the Americas. The resource center building (16,000 square feet) has spaces for an event/conference center, a computer lab, 2 library halls, 4 study/tutorial rooms, and daycare center. The project includes spaces on the 15 acres land for future growth and inclusion of a soccer field, basketball and tennis courts.

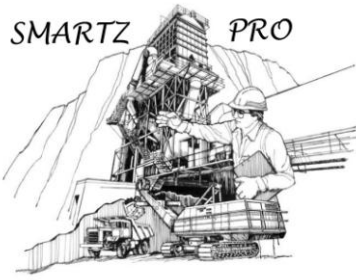

The Resource Center was designed to take the shape of the letter "H", representing **hope** for peace and prosperity that every Grand Gedeon has after the Liberian brutal civil war.

There is a symbolic female monument standing in a water fountain weaving to visitors approaching the Center. This symbolizes the Grand Gedeh women in the USA, separated by water – the Atlantic Ocean – weaving and welcoming Grand Gedeans to the Center.

Smartz Pro LLC

Engineering Construction, Management and Consultancy

This private sector housing complex was conceptualized and designed by Smartz Pro to serve students of the University of Liberia at the new Fendell campus on the Monrovia Bensonville Highway.

The project was designed to be constructed in phases by engineering the master plan to enable the complex to be operational as phases are complete.

The housing complex includes 20 independently standing buildings. Each building has 3 floors, with 2 apartments on each floor. This compact design fits 120 apartments or 240 rooms on just 3 acres of land.
